What is this product?

Type

Shares of a sub-fund of Fidelity Institutional Variable Capital Company Fund plc, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended.

Objectives

Objective: The fund aims to achieve a high level of current income and capital appreciation.

Investment Policy: The fund invests primarily in high-yielding, lower quality debt securities of issuers that have their principal business activities in the U.S. The fund may also invest in debt securities issued by non-U.S. companies if they are denominated in U.S. dollars.

The fund may also invest in loans and private placements (including Rule 144A securities). The fund may invest up to 10% in private transactions which are non-Rule 144A securities.

The fund may also invest in other permitted assets such as cash and cash equivalents and other collective investment schemes.

The fund may invest up to 25% in any one market sector, no more than 15% in U.S. Treasury issues and no more than 10% in U.S. government agency issues.

The fund may invest no more than 6% in the securities of any one issuer and no more than 10% in securities with a final maturity date in excess of 20 years.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund employs an active investment strategy that normally invests in income producing bonds, preferred shares and convertible bonds or warrants.

The fund may also invest in non-income producing bonds, including defaulted bonds and shares or related securities of companies, received through reorganisation, corporate actions, or conversions. The fund will have an emphasis on lower-quality bonds, with at least 70% invested in bonds rated B- or higher, or equivalent, by a Nationally Recognized Statistical Rating Organisation. The fund may invest no more than 30% in non-rated or lower-rated (CCC or lower or equivalent) bonds.

Benchmark: ICE BofA US High Yield Constrained Index (the "Benchmark"), an index that does not take into account ESG characteristics. Used for: risk monitoring and performance

comparison. The fund is actively managed and references the Benchmark. The Investment Manager has a wide range of discretion over the composition of the fund's portfolio. It may take exposures that are not included in, and that have different weightings from, the Benchmark. Therefore, there are no restrictions on the extent to which the fund's performance may deviate from that of the Benchmark. The Investment Manager may set internal guidelines which, in turn, may reference deviations from the Benchmark.

Base Currency: USD.

Additional information: You may sell (redeem) some or all of your Shares on any Valuation Day.

As this is a non-distributing share class, dividends are re-invested. This key information document describes a sub-fund of Fidelity Institutional Variable Capital Company plc. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Institutional Variable Capital Company plc. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds.

For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from FIL Investment Management (Luxembourg) S.A. These documents and details of the Remuneration Policy are available via <https://www.fidelity.ie>. The Net Asset Value per Share of each class of Shares in each Sub-Fund calculated as of the relevant Valuation Point in respect of a Dealing Day will be available from the Administrator on each Valuation Point and will be published on www.bloomberg.com or such other websites or newspapers as the Directors may decide from time to time and as notified to Shareholders in advance. Such prices in respect of each Dealing Day will be published on that day.

Depositary: Brown Brothers Harriman Trustee Services (Ireland) Limited.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 4 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.
You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Additional Risks: liquidity, leverage, credit, interest rate.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.à.r.l., Ireland Branch is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 4 years Example investment : USD 10,000		If you exit after 1 year	If you exit after 4 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,950 USD	6,880 USD
	Average return each year	-30.5%	-8.9%
Unfavourable	What you might get back after costs	8,220 USD	9,720 USD
	Average return each year	-17.8%	-0.7%
Moderate	What you might get back after costs	9,990 USD	11,270 USD
	Average return each year	-0.1%	3.0%
Favourable	What you might get back after costs	11,390 USD	13,270 USD
	Average return each year	13.9%	7.3%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 09/2018 and 09/2022.

The moderate scenario occurred for an investment between 05/2015 and 05/2019.

The favourable scenario occurred for an investment between 01/2016 and 01/2020.

What happens if FIL Investment Management (Luxembourg) S.à.r.l., Ireland Branch is unable to pay out?

The assets and liabilities of this product are segregated from those of FIL Investment Management (Luxembourg) S.à.r.l., Ireland Branch. There is no cross-liability between these entities, and the product would not be liable if FIL Investment Management (Luxembourg) S.à.r.l., Ireland Branch or any delegated service provider were to fail or default.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	660 USD	994 USD
Annual cost impact (*)	6.6%	2.4% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.4% before costs and 3.0% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay in when entering this investment.	294 USD
Exit costs	3.00% of your investment before it is paid out to you.	291 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.77% of the value of your investment per year. This is an estimate based on actual costs over the last year.	75 USD
Transaction costs	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 4 years

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.
