What is this product?

Type

This product is an investment trust company, which is a type of alternative investment fund.

This product is open for an unlimited duration, however, continuation votes are held every three years at the Company's Annual General Meeting.

Objectives

Objective: The Company aims to achieve long term growth by primarily investing in securities and financial instruments providing exposure to emerging markets companies.

Investment Policy: The Investment Manager will invest at least 80% in companies whose head office, listing, assets, operations, income, or revenues are predominantly in or derived from emerging markets. The Investment Manager will maintain a portfolio with at least 75 holdings in companies listed or operating in at least 15 countries. The Company may also invest into other transferable securities, investment companies, money market instruments, unlisted shares, cash and deposits and is also able to use derivatives for efficient portfolio management, to gain additional market exposure (gearing), to seek a positive return from falling asset prices, and for other investment purposes.

Benchmark: MSCI Emerging Markets Index (Net). Used for:

investment selection, risk monitoring and performance comparison.

Base Currency: USD.

Additional information: The price of shares in the Company will depend on the performance of the value of the Company's underlying assets but, in addition, this value may be subject to a discount or a premium reflecting the price at which the Company's shares are valued and traded on the stock market.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.
 The actual risk can vary significantly if you cash in at the early stage and you may get back less.
 You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

The shares in the investment trust are listed on the London Stock Exchange and their price is affected by supply and demand. There is no right of redemption or encashment. Market conditions may change this may lead to securities being difficult to trade.

The investment trust can gain additional exposure to the market, known as gearing, potentially increasing volatility.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Services (UK) Limited is not able to pay you what is owed, you could lose your entire investment.

Investment performance information

The fund's performance will be primarily affected by the performance of the market in which it is invested, as represented by the relevant index.

The most relevant market index is the MSCI Emerging Markets Index (Net). The fund is likely to have a similar performance and volatility to the market index, however the fund is actively managed and so though both are expected to differ from the market index over the longer term.

What could affect my return positively?

The return of the fund would be expected to be positive if the individual companies or the general market in which it is invested experiences positive returns, which can be driven by investment sentiment, political and issuer-specific factors.

What could affect my return negatively?

The return of the fund would be expected to be negative if the individual companies or the general market in which it is invested experiences negative returns, which can be driven by investment sentiment, political and issuer-specific factors.

If the fund is redeemed under severely adverse market conditions it is possible you may receive back less than you invested as a result of lower value and negative impacts of lack of liquidity

What happens if FIL Investment Services (UK) Limited is unable to pay out?

The assets and liabilities of this product are segregated from those of FIL Investment Services (UK) Limited. There is no cross-liability between these entities, and the product would not be liable if FIL Investment Services (UK) Limited or any delegated service provider were to fail or default.
