What is this product?

Type

Shares of a sub-fund of Fidelity UCITS II ICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended.

Objectives

Objective: The fund aims to provide an attractive level of risk adjusted total return (income plus capital appreciation) from a portfolio of debt securities issued worldwide.

Investment Policy: The fund invests primarily in a broad range of fixed income securities and money market instruments which are issued by governments of, government agencies or corporate issuers worldwide. These include bonds, bonds with warrants, convertible bonds, contingent convertible bonds (including corporate hybrid securities), subordinated bonds, dim sum bonds, debentures and notes.

The fund may invest in securities issued in both developed and emerging market countries.

The fund may also invest in other permitted assets such as asset backed securities, Sukuk structures (Islamic debt instruments which represent a proportionate beneficial ownership in an asset or pool of assets), cash and cash equivalents and other collective investment schemes. The fund may invest up to 30% in below-investment grade securities and up to 50% in dim sum bonds.

The fund may invest, in the aggregate, up to 20% directly in onshore China fixed income securities through either the China Inter-bank Bond Market or the QFII programme, subject to a maximum of 10% being invested through the QFII programme.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Investment Process: The Investment Manager will approach investment opportunities from a total return perspective, seeking to deliver attractive risk adjusted returns by extracting the highest level of return per unit of risk or minimising the risk for each unit of

return. Accordingly, for every level of risk the Investment Manager will look for debt securities with the most attractive yield and for any level of yield, the Investment Manager will aim to purchase debt securities with the lowest level of risk.

The selection of investments shall be driven by bottom-up security selection, based on fundamental and relative-value credit analysis.

Benchmark: N/A. The fund is actively managed without reference to a benchmark.

Base Currency: USD

Additional information: You may sell (redeem) some or all of your shares on any Valuation Day.

Income earned by the fund is reinvested in additional shares or paid to shareholders on request. This key information document describes a sub-fund of Fidelity UCITS II ICAV. A separate pool of assets is invested and maintained for each sub-fund of Fidelity UCITS II ICAV. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 2 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 2 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Additional risks: emerging markets, credit.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A., Ireland Branch is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 2 years Example investment : USD 10,000		If you exit after 1 year	If you exit after 2 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	9,030 USD	9,140 USD
	Average return each year	-9.7%	-4.4%
Unfavourable	What you might get back after costs	9,090 USD	9,140 USD
	Average return each year	-9.1%	-4.4%
Moderate	What you might get back after costs	10,110 USD	10,180 USD
	Average return each year	1.1%	0.9%
Favourable	What you might get back after costs	10,660 USD	10,880 USD
	Average return each year	6.6%	4.3%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 01/2014 and 01/2016.

The moderate scenario occurred for an investment between 12/2019 and 12/2021.

The favourable scenario occurred for an investment between 11/2018 and 11/2020.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 2 years
Total costs	42 USD	86 USD
Annual cost impact (*)	0.4%	0.4% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.3% before costs and 0.9% after costs.
