## What is this product?

### Type

This product is an investment trust company, which is a type of alternative investment fund.

This product is open for an unlimited duration, however, continuation votes are held every three years at the Company's Annual General Meeting.

### Objectives

**Objective:** The Company aims to achieve long term capital growth by investing predominantly in equities and their related securities of Japanese companies. The Investment Manager will typically focus on those companies primarily listed on Japanese stock exchanges whose growth prospects are not fully recognised by the market ("growth at a reasonable price"). The Investment Manager is not restricted in terms of size or industry of the underlying entities in which it invests. The Company may also hold cash or invest in cash equivalents including money market instruments, and is able to use derivatives for efficient portfolio management, gearing and investment purposes. The Company has adopted a variable management fee which is calculated by referencing performance relative to the TOPIX Index (Tokyo Stock Exchange TOPIX Total Return Index).

**Investment Policy:** The Investment Manager will typically focus on those companies primarily listed on Japanese stock exchanges whose growth prospects are not fully recognised by the market ("growth at a reasonable price"). The Investment Manager is not restricted in terms of size or industry of the underlying entities in which it invests. The Company may also hold cash or invest in cash

equivalents including money market instruments, and is able to use derivatives for efficient portfolio management, gearing and investment purposes.

**Benchmark:** TOPIX Index (Tokyo Stock Exchange TOPIX Total Return Index). Used for: investment selection, risk monitoring and performance comparison.

**Base Currency:** GBP.

**Additional information:** The price of shares in the Company will depend on the performance of the value of the Company's underlying assets but, in addition, this value may be subject to a discount or a premium reflecting the price at which the Company's shares are valued and traded on the stock market.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 5 years.  
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

The shares in the investment trust are listed on the London Stock Exchange and their price is affected by supply and demand. There is no right of redemption or encashment. Market conditions may change this may lead to securities being difficult to trade.

The investment trust can gain additional exposure to the market, known as gearing, potentially increasing volatility.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Services (UK) Limited is not able to pay you what is owed, you could lose your entire investment.

### Investment performance information

The fund's performance will be primarily affected by the performance of the market in which it is invested, as represented by the relevant index.

The most relevant market index is the TOPIX Index (Tokyo Stock Exchange TOPIX Total Return Index). The fund is likely to have a similar performance and volatility to the market index, however the fund is actively managed and so though both are expected to differ from the market index over the longer term.

#### What could affect my return positively?

The return of the fund would be expected to be positive if the individual companies or the general market in which it is invested experiences positive returns, which can be driven by investment sentiment, political and issuer-specific factors.

#### What could affect my return negatively?

The return of the fund would be expected to be negative if the individual companies or the general market in which it is invested experiences negative returns, which can be driven by investment sentiment, political and issuer-specific factors.

If the fund is redeemed under severely adverse market conditions it is possible you may receive back less than you invested as a result of lower value and negative impacts of lack of liquidity

### What happens if FIL Investment Services (UK) Limited is unable to pay out?

Recommended holding period: 5 years.

The assets and liabilities of this product are segregated from those of FIL Investment Services (UK) Limited. There is no cross-liability between these entities, and the product would not be liable if FIL Investment Services (UK) Limited or any delegated service provider were to fail or default.

The actual risk can vary significantly if you cash in at an early stage and you may get back less. There are no exit fees charged but the person selling you the product may do so. This product does not include any protection from future market performance so you could lose some or all of your investment

### What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

#### Costs over Time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future.

Investment GBP10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
Total costs	167.82 GBP	527.88 GBP	923.20 GBP
Impact on return (RIY) per year (%)	1.68%	1.68%	1.68%

## Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
