What is this product?

Type

Shares of a sub-fund of Fidelity Institutional Liquidity Fund plc, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity Institutional Liquidity Fund plc may terminate the fund by way of liquidation or merger.

Objectives

Objective: The fund aims to maintain capital value and liquidity whilst producing a return to the investor in line with money market rates.

Investment Policy: The fund invests at least 99.5% in US Treasury obligations (which are money market instruments issued or guaranteed by the US Treasury and payments of principal and interest thereon which are backed by the full faith and credit of the US government), reverse repurchase agreements secured by such instruments and cash (including deposits).

Investment Process: Investments will have a credit quality consistent with maintaining Moody's Aaa-mf rating and a rating of AAAM by Standard & Poor's for the fund. Such ratings were solicited by the manager of the fund and financed by either the manager or the fund.

Benchmark: N/A. The fund is actively managed without reference to a benchmark.

Base Currency: USD.

Additional information: You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day.

The fund is a Public Debt Constant Net Asset Value Money Market

Fund and operates as a Short-Term Money Market Fund. Investment in a Money Market Fund is different from an investment in deposits, in particular, the principal invested in a Money Market Fund may fluctuate and the risk of loss of the principal is to be borne by the investor. The fund is not a guaranteed investment. It does not rely on external support for guaranteeing the liquidity of the fund or stabilising the net asset value of shares in the fund. Income earned by the fund is reinvested in additional shares or paid to shareholders on request. This key information document describes a sub-fund of Fidelity Institutional Liquidity Fund plc. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Institutional Liquidity Fund plc. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from FIL Investment Management (Luxembourg) S.à.r.l., Ireland Branch. These documents and details of the Remuneration Policy are available via www.fidelityinternational.com. The Net Asset Value of the fund is available at the registered office of Fidelity Institutional Liquidity Fund plc, and at www.fidelity.ie.

Depository: J.P. Morgan SE, Dublin Branch.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 6 months; who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class.

This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Additional Risks: none.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.à.r.l., Ireland Branch is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 6 months Example investment : USD 10,000		If you exit after 6 months
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	9,980 USD
	Average return each year	-0.4%
Unfavourable	What you might get back after costs	10,000 USD
	Average return each year	0.0%
Moderate	What you might get back after costs	10,030 USD
	Average return each year	0.6%
Favourable	What you might get back after costs	10,130 USD
	Average return each year	2.7%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 01/2021 and 07/2021.

The moderate scenario occurred for an investment between 07/2017 and 01/2018.

The favourable scenario occurred for an investment between 11/2023 and 05/2024.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 6 months
Total costs	15 USD
Annual cost impact (*)	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.2% before costs and 0.0% after costs.

Composition of Costs
