This PRIIP is authorised in Luxembourg.

Structured Invest S.A. is authorised in Luxembourg and regulated by Commission de Surveillance du Secteur Financier.

31 December 2023

What is this product?

Type

This is a Luxembourg fund in the legal form of a société anonyme, established as a société d'investissement à capital variable according to the law of December 17, 2010 on undertakings for collective investment.

Term

The Fund is an unlimited-term fund.

Objectives

The Sub-Fund's investment objective is to maximise total return. The Sub-Fund invests globally, with no prescribed country or regional limits, at least 70% of its net assets in equity securities. The Sub-Fund will generally seek to invest in securities that are undervalued. The Sub-Fund may also invest in the equity securities of small and emerging growth companies. Currency exposure is managed flexibly. The Sub-Fund adopts a flexible asset allocation policy and will invest in a diversified portfolio of assets. The asset allocation policy is consistent with the principles of environmental, social and governance ("ESG") focused investing. Although primarily an equity-oriented portfolio, individual investments may include bonds, distressed securities and contingent convertible bonds, as well as currencies and cash. The Sub-Fund will invest in securities issued by corporations, governments and government related issuers, other non-government issuers, located in both developed and emerging markets, and denominated in global currencies. Such issuers will be systematically screened and considered suitable according to the Investment Manager's assessment and ESG criteria analysis and policy, as detailed below. The Sub-Fund's benchmark is the MSCI World ACWI Index (the "Index"). The Index has been selected as the benchmark because it is representative of the investment universe of the Sub-Fund and it is therefore an appropriate performance comparator. The majority of the Sub-Fund's equity securities may not necessarily be components of or have weightings derived from the Index. The Investment Manager has a wide range of discretion relative to the Index. While the Sub-Fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the Sub-Fund's performance will differ materially from the Index. For further details, please refer to the fund documents.

Intended retail investor

This share class is aimed at private clients, professional clients and eligible counterparties. This share class is aimed at private clients, professional clients and eligible counterparties who have the objective of general asset formation/asset optimization and a medium to long-term investment horizon of more than 3 years. Investment in the Fund is only suitable for investors who are able to estimate the risks and value of the investment. The higher long-term return opportunities require the willingness of investors to accept significant fluctuations in the value of shares and, if necessary, to accept a significant loss of capital. The investor may bear losses (up to the full loss of the invested capital). The Fund falls into risk class 4 on a scale of 1 (safety-oriented; very low return) to 7 (very risk-tolerant; highest return).

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

| Recommended holding period : 4 years | | | |
|--------------------------------------|---|--------------------------|---------------------------|
| Investment EUR10,000 Scenarios | | If you exit after 1 year | If you exit after 4 years |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | 1,460 EUR | 1,880 EUR |
| | Average return each year | -85.4% | -34.1% |
| Unfavourable | What you might get back after costs | 8,420 EUR | 9,810 EUR |
| | Average return each year | -15.8% | -0.5% |
| Moderate | What you might get back after costs | 10,390 EUR | 13,850 EUR |
| | Average return each year | 3.9% | 8.5% |
| Favourable | What you might get back after costs | 13,860 EUR | 16,480 EUR |
| | Average return each year | 38.6% | 13.3% |

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2021 and 12/2023.

The moderate scenario occurred for an investment between 03/2017 and 03/2021.

The favourable scenario occurred for an investment between 03/2018 and 03/2022.

What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

| | If you exit after 1 year | If you exit after 4 years |
|-------------------------------|--------------------------|---------------------------|
| Total costs EUR | EUR 444 | EUR 1,737 |
| Annual cost impact (*) | 4.4% | 3.7% per year |

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.2% before costs and 8.5% after costs.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|--|---|--------------------------|
| Entry costs | We do not charge an entry fee. | EUR 0 |
| Exit costs | 1.70% of your investment before it is paid out to you. | EUR 170 |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 2.40% of the value of your investment per year. This is an estimate based on actual costs over the last year and includes placement fee amortization. | EUR 247 |
| Transaction costs | 0.27% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | EUR 28 |
| Incidental costs taken under specific conditions | | |
| Performance fees | There is no performance fee for this product. | EUR 0 |

How long should I hold it and can I take money out early?

Recommended holding period: 4 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.

How can I complain?

You can submit complaints to us by following these steps:
