What is this product?

Type

This is a Luxembourg fund in the legal form of a société anonyme, established as a société d'investissement à capital variable according to the law of December 17, 2010 on undertakings for collective investment.

Term

The fund is a perpetual fund. The Management Company can proceed unilaterally to a redemption of a Share Class of an investor or switch the holding to another Class if the investor no longer meets the qualifying criteria to maintain the Class he holds. The Board of Directors may decide under certain circumstances to compulsorily redeem all Shares of the relevant Sub-Fund or Class at the Net Asset Value per share for the Valuation Date in respect of which such decision shall be effective, and to terminate and liquidate such Sub-Fund or Class.

Objectives

The Sub-Fund's investment objective is to seek maximising total return, consistent with preservation of capital and prudent investment management. The Sub-fund is a multi-asset portfolio, which will invest primarily in equities, government bonds, corporate bonds; exposures will be obtained via plain vanilla securities, as well as derivatives.

The Sub-Fund aims to achieve its investment objective by taking exposure to a wide range of asset classes, including – but not limited to – equities, fixed income, foreign exchange as outlined below. The Sub-Fund shall not invest directly in commodities.

The minimum amount of investments used to meet the environmental or social characteristics promoted by the Sub-Fund will be 51% of its net assets. In making investment decisions, the Investment Manager considers various quantitative and qualitative data relating to global economies and projected growth of various industrial sectors and asset classes. The Investment Manager uses a three-factor approach to evaluating asset classes and their risks in seeking to achieve the Sub-Fund's investment objective which consists of a) fundamental analysis relating to global economics and projected growth of various industrial sectors, b) valuation analysis, and c) assessment of market demand of and supply for asset classes. The Investment Manager evaluates these factors on an ongoing basis and uses a combination of direct investment, derivative exposure and marginally collective investment schemes to implement a resulting mix of asset classes within the Sub-Fund that reflects the Sub-Fund's investment objective.

Similarly, although the Sub-Fund has the capability to use the types of investment outlined in this policy, it is possible that certain instrument types are not used all of the time. While analysis is performed daily, material shifts in investment exposures typically take place over medium to longer periods of time. For further details, please refer to the fund documents.

Intended retail investor

The share class is aimed at private clients, professional clients and eligible counterparties. An investment in this Sub-Fund is suitable only for investors who are able to appraise the risks and economic value of the investment. The investor must be prepared to accept an increased volatility of the Sub-Fund and potentially high capital losses in order to achieve above-average potential investment performances. The Sub-Fund is intended for investors with a medium to long-term investment horizon. Shareholders are entitled to request the redemption of their Shares at any time at the Net Asset Value per share issued, less any redemption fee if applicable. This is a distributing share class.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 4 years			
Investment CZK10,000 Scenarios		If you exit after 1 year	If you exit after 4 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5,540 CZK	5,860 CZK
	Average return each year	-44.6%	-12.5%
Unfavourable	What you might get back after costs	8,180 CZK	9,100 CZK
	Average return each year	-18.2%	-2.3%
Moderate	What you might get back after costs	9,830 CZK	10,490 CZK
	Average return each year	-1.7%	1.2%
Favourable	What you might get back after costs	10,690 CZK	12,260 CZK
	Average return each year	6.9%	5.2%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 10/2021 and 12/2024.

The moderate scenario occurred for an investment between 08/2018 and 08/2022.

The favourable scenario occurred for an investment between 11/2017 and 11/2021.

What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CZK 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs CZK	666 CZK	1,264 CZK
Annual cost impact (*)	6.7%	3.2% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4% before costs and 1.2% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 5.00% of the amount you pay in when entering this investment.	485 CZK
Exit costs	We do not charge an exit fee for this product.	0 CZK
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.71% of the value of your investment per year. This is an estimate based on actual costs over the last year.	166 CZK
Transaction costs	0.15% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	15 CZK
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 CZK

How long should I hold it and can I take money out early?

Recommended holding period: 4 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product. Possible share class specific redemption fees have to be taken into account for disinvestments. You can redeem your investment at any time as set out in the prospectus. You may receive less than expected if you cash in earlier than the RHP since the Fund will be less likely to achieve its objectives. The RHP must not be taken as a guarantee or an indication of future performance, return or risk levels.

How can I complain?

You can submit complaints to us by following these steps:

By mail: Structured Invest S.A., 8-10, rue Jean Monnet, L-2180 Luxembourg

By telephone: +352 248 248 00 Mon - Fri from 9:00 a.m. to 6:00 p.m.

By email: complaintssi.uib.lu@unicredit.eu

In the event of a complaint, please describe the underlying facts in as much detail as possible and send us all the necessary documents. We will respond in writing only within no later than one month from the date of sending of the complaint.
