What is this product?

Type

This is a Luxembourg fund in the legal form of a société anonyme, established as a société d'investissement à capital variable according to the law of December 17, 2010 on undertakings for collective investment.

Term

The fund is a perpetual fund. Each sub-fund may, however, be liquidated by the Management Company, with the Management Company basically acting as liquidator.

Objectives

The investment objective of the sub-fund is to participate on a medium and long-term basis in capital appreciation of global equity and mainly European bond markets by using dynamic allocation strategy and simultaneously benefit from the 85% guarantee ("85% Lookback Guarantee"). The sub-fund is an active managed fund and may invest from 0% to 100% in fixed and floating rate securities, equities, units of undertakings for collective investment in transferable securities or UCITS exchange traded funds (UCITS-ETFs in accordance with article 41 (1) of the Law of 17 December 2010)), money market related instruments and cash. The sub-fund is entitled to invest more than 10% of its net asset value in units of undertakings for collective investment in transferable securities or UCITS exchange traded funds (UCITS-ETFs). The risky portfolio in the sub-fund may vary between 0% and 100% of Net Asset Value and comprises equities or equity equivalents, (e.g. equity index futures, equity UCITS ETF) and bonds or bond equivalents, (e.g. bond UCITS ETF, bond futures), whose rating are "investment grade" or "below investment-grade", whereby a maximum of 10% of the net assets of the sub-fund being invested in so called "high yield" bonds (i.e., below investment grade). Exposures to equities or equity equivalents are limited to 60% of the net asset value. In geographical terms, investments in equities or equity equivalents are made globally, in bonds or bond equivalents mainly in such that are issued in Euro and mainly within European Union. For protection against extreme losses whereas the dynamic allocation strategy described above may not be sufficient to ensure for each share class the respective Guaranteed Value, the sub-fund regularly enters for each share class into derivative instruments (e.g. put option with UniCredit Bank AG) that compensate the sub-fund in such cases. Any costs of the derivative instruments (e.g. for the put option, the option premium) shall be borne by the sub-fund assets. The sub-fund must not invest in Asset Backed Securities (ABS), Mortgage Backed Securities (MBS) and Contingent Convertibles Bonds (CoCo Bonds). Furthermore, the sub-fund will not invest in distressed or defaulted securities. For further details, please refer to the fund documents.

Intended retail investor

The share class is aimed at institutional investors. An investment in this sub-fund is suitable only for investors who are able to appraise the risks and economic value of the investment. The investor must be prepared to accept a moderate volatility of the fund units and potentially high capital losses in order to achieve returns higher than the usual market's interest level. The sub-fund is intended for investors with a medium to long-term investment horizon. The investor may bear losses (up to the full loss of the invested capital). The Fund falls into risk class 3 on a scale of 1 (safety-oriented; very low return) to 7 (very risk-tolerant; highest return). UniCredit Bank GmbH, Munich Germany (also known under its brand name HypoVereinsbank, "Guarantor") guarantees that for each share class, the net asset value per share will not be less than 85% of the maximum net asset value per share attained since the prevailing Lookback Date ("Guaranteed Value"). Shareholders are entitled to request the redemption of their Shares at any time at the Net Asset Value per share issued, less any redemption fee if applicable. This redemption will only be carried out on a Valuation Day. This is a non-distributing share class.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

You are entitled to receive back at least 85% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 4 years			
Investment EUR10,000 Scenarios		If you exit after 1 year	If you exit after 4 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	8,210 EUR	7,550 EUR
	Average return each year	-17.9%	-3.9%
Unfavourable	What you might get back after costs	9,560 EUR	9,050 EUR
	Average return each year	-4.4%	-1.4%
Moderate	What you might get back after costs	10,050 EUR	10,230 EUR
	Average return each year	0.5%	0.3%
Favourable	What you might get back after costs	10,670 EUR	12,000 EUR
	Average return each year	6.7%	2.6%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2019 and 12/2023.

The moderate scenario occurred for an investment between 03/2017 and 03/2021.

The favourable scenario occurred for an investment between 01/2016 and 01/2020.

What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs EUR	184 EUR	1,318 EUR
Annual cost impact (*)	1.8%	2.3% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.3% before costs and 3.6% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.49% of the value of your investment per year. This is an estimate based on actual costs over the last year.	176 EUR
Transaction costs	0.08% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	8 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 4 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product. You can redeem your investment at any time as set out in the prospectus. You may receive less than expected if you cash in earlier than the RHP since the Fund will be less likely to achieve its objectives. The RHP must not be taken as a guarantee or an indication of future performance, return or risk levels.

How can I complain?

You can submit complaints to us by following these steps:

By mail: Structured Invest S.A., 8-10, rue Jean Monnet, L-2180 Luxembourg

By telephone: +352 248 248 00 Mon - Fri from 9:00 a.m. to 6:00 p.m.

By email: complaintssi.uib.lu@unicredit.eu

In the event of a complaint, please describe the underlying facts in as much detail as possible and send us all the necessary documents. We will respond in writing only within no later than one month from the date of sending of the complaint.
