What is this product?

Type

This is a Luxembourg fund in the legal form of a société anonyme, established as a société d'investissement à capital variable according to the law of December 17, 2010 on undertakings for collective investment.

Term

The Fund is an unlimited-term fund.

Objectives

The Sub-Fund's investment objective is to achieve positive returns in excess of cash over a full market cycle over the recommended holding period. The Sub-Fund invests, directly or indirectly, in a broad range of securities from around the world, including emerging markets (including offshore bonds listed in European stock exchanges and onshore Chinese bonds through Bond Connect). These investments may include government and corporate bonds of any maturity, equities, convertible bonds and money market securities. The Sub-Fund's bond investments may be of any quality (investment grade or below), while targeting an average rating of BBB/BBB-. Investments in bonds with a rating below investment grade will not exceed 30% of the Sub-Fund's net assets whilst investments in unrated bonds will only represent a very limited portion of the Sub-Fund's portfolio (not exceeding 5% of the Sub-Fund's net assets). The selection process of bonds is based on fundamental analysis. In case of downgrade, the Investment Manager carries on an analysis of issuer fundamentals and bond evaluation and determines the course of action (e.g., keeping the downgraded investment in the Sub-Fund's portfolio versus realisation of the same) in the best interest of the investors. The Sub-Fund may invest up to 100% of its net assets in equities and up to 25% in convertible bonds (including up to 10% in contingent convertible bonds, "CoCos"). The Sub-Fund may invest in defaulted or distressed securities but only as an active investment opportunity in very specific market environments (e.g., if there is a strong recovery story behind a specific sector or single name and the risk/reward is particularly attractive) and to a limited extent (up to 5% of the Sub-Fund's net assets). The Sub-Fund may invest up to 10% of its assets in depository receipts (American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs) eligible (including their respective underlying) under the 2010 Law). For further details, please refer to the fund documents.

Intended retail investor

The UCITS Fund is aimed at private clients, professional clients and eligible counterparties who have the objective of general asset formation/asset optimization and a medium to long-term investment horizon of more than 3 years. Investment in the Fund is only suitable for investors who are able to estimate the risks and value of the investment. The higher long-term return opportunities require the willingness of investors to accept significant fluctuations in the value of shares and, if necessary, to accept a significant loss of capital. The investor may bear losses (up to the full loss of the invested capital). The Fund falls into risk class 3 on a scale of 1 (safety-oriented; very low return) to 7 (very risk-tolerant; highest return).

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 4 years			
Investment EUR10,000			
Scenarios		If you exit after 1 year	If you exit after 4 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5,320 EUR	5,450 EUR
	Average return each year	-46.8%	-14.1%
Unfavourable	What you might get back after costs	8,550 EUR	5,450 EUR
	Average return each year	-14.5%	-14.1%
Moderate	What you might get back after costs	10,320 EUR	10,980 EUR
	Average return each year	3.2%	2.4%
Favourable	What you might get back after costs	11,750 EUR	12,990 EUR
	Average return each year	17.5%	6.8%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 04/2022 and 05/2023.

The moderate scenario occurred for an investment between 08/2016 and 08/2020.

The favourable scenario occurred for an investment between 08/2013 and 08/2017.

What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs EUR	EUR 250	EUR 1,061
Annual cost impact (*)	2.5%	2.6% per year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 2.4% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	EUR 0
Exit costs	We do not charge an exit fee for this product.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.24% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 127
Transaction costs	1.20% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 123
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	EUR 0

How long should I hold it and can I take money out early?

Recommended holding period: 4 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.
