

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 4 years			
Investment EUR10,000			
Scenarios		If you exit after 1 year	If you exit after 4 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5,220 EUR	5,340 EUR
	Average return each year	-47.8%	-14.5%

The favourable scenario occurred for an investment between 08/2013 and 08/2017.

What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs EUR	EUR 250	EUR 1,061
Annual cost impact (*)	2.5%	2.6% per year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 2.4% after costs.
